BIOGRAPHICAL INFORMATION

Steven Putnam has worked in the construction industry for over twenty-one years. A strong desire to learn everything he can from as many sources as possible has led him to become a great resource for knowledge and direction with regard to multiple facets of the industry. This same desire makes a valuable asset to any team or position. With a great deal of understanding for the construction process, he excels at troubleshooting and quick remediation of issues that arise in the field. He challenges himself to continue attaining certifications that will be of value in the industry. As such he is also a great resource for employee training and explanation of the various industry certifications and testing.

Steven has a calm temperament and is quick to become a friendly source of information. He has acted as a mediator between clients and contractors on multiple occasions. Given his diverse employment and experience he has a unique understanding of the various field and administrative sides of projects, and can be a bridge between many of the gaps that arise.

Even with a large knowledge base and strong understanding of current industry standards, Steven is always working towards gaining new knowledge and certifications. Expanding his ability to aide and inspect in the industry will continue to be a driving force throughout his career. As the industry changes and evolves he has a strong drive to change and evolve with it.

CAREER HISTORY – BY POSITION

Project Manager/Coordinator

LKN Engineering and Testing
ECS Midwest, LLC
Intertek-PSI

January 2010 to Present

August 2022 to Present

February 2022 to July 2022

January 2011 to February 2020

- Performed writing, scheduling, cost evaluation, review, and distribution of over 500 client proposals resulting in hundreds of thousands of dollars in revenue for various companies
- Responsible for engineering/consultant management for over 250 projects that required the performance of contract review, project setup, specification review, testing requirements and scheduling, budget monitoring, technician selection and scheduling, project meetings, project oversight, certification requirements, verification and training, logging special inspection non-conformances, discrepancies, and applied corrective actions.
- Responsible for reaching out to perspective and existing clients to perform customer service, satisfaction surveys, mediation, specification explanation, project deadline evaluation, invoice clarification.
- Created, distributed, and performed collections as required for project invoices

CAREER HISTORY – BY POSITION CONT.

Laboratory Manager

LKN Engineering and Testing
Somat Engineering of Ohio
Intertek-PSI

June 2001 to Present
August 2022 to Present
February 2020 to July 2020
June 2001 to February 2020

- Responsible for soils, aggregate, asphalt, concrete, and fire-proofing materials testing, reporting, oversight, and review for over 100 clients and over 1,000 projects resulting in annual revenues averaging over 750 thousand dollars per year
- Directed technician training, evaluation, certification, and growth plans for over 100 technicians
- Responsible for all equipment purchasing, inventory, calibration, and maintenance
- Established, monitored, and maintained AASHTO Re:Source, CCRL, Army Corps of Engineers and DOT accreditations for multiple offices and special projects throughout the United States

2007 to 2008
2007 to 2008

- Performed asbestos and hazardous materials site assessments for over 50 projects
- Created building specific asbestos management plans for building owners
- Performed final clearances of asbestos abatement areas prior to releasing limited access restrictions
- Performed monitoring of air quality for mold and contaminants
- Performed heavy metal wastewater sampling analysis for medical facilities
- Assisted with environmental phase 2 site assessments for multiple school, medical, and private projects

CERTIFICATIONS

CompTIA

- Security+ ce

NICET (National Institute for Certifications in Engineering Technologies)

- Construction Materials Testing – Soils/Concrete/Asphalt Level IV
- Transportation Engineering Tech. - Highway Construction Inspection Level II

International Code Council

- Reinforced Concrete Special Inspector
- Structural Masonry Special Inspector
- Spray Applied Fire Proofing Special Inspector

American Concrete Institute

- Concrete Field Technician I
- Concrete Strength Testing Technician

Ohio Department of Transportation

- Asphalt Level II
- Compaction
- Advanced Structures
- Traffic Work Zone
- Flexible Pavement
- Project Inspector
- Traffic Signal and Lighting Inspector
- Project Structure Inspector

North Carolina Department of Transportation (Current / Expired)

- Concrete Field Technician (Current)
- QMS Roadway Technician (Current)
- ABC Sampling (Expired 9/16/19)
- Borrow Pit Sampling (Expired 9/16/19)
- Chemically Stabilized Subgrade (Expired 6/22/19)
- Conventional Density (Expired 9/18/19)
- QA Chemical Stabilization (Expired 6/23/21)
- QC/QA Aggregate Sampling (Expired 3/16/21)
- QC/QA Aggregate Testing (Expired 3/16/21)
- QMS Level I Plant (Expired 12/31/21)

International Municipal Signal Association

- Roadway Lighting Technician Level I
- Traffic Signal Technician Level I
- Traffic Signal Construction Technician Level II
- Work Zone Temporary Traffic Control Technician
